ABOUT ME

Passionate full-stack developer with proficiency in JavaScript, React, Django, Python, PHP, MySQL, C, and C++. Skilled in crafting dynamic web interfaces and robust backend systems. Experienced in diverse projects, adept with Docker and Git/GitHub. Committed to continuous learning and innovation in coding.

WORK EXPERIENCE

WebServ 2024
42 project

Contributed to the development of WebServ 42, a lightweight web server designed to serve static web pages efficiently, using C++. Responsibilities included coding, debugging, and optimizing server functionality to ensure fast and reliable performance. Collaborated with team members to implement features such as HTTP request handling, file serving, and concurrency management. Demonstrated proficiency in C++ programming, software development best practices, and teamwork throughout the project lifecycle

Minishell Development Project 2023
42 project

Contributed to the development of a minishell, a simplified Unix shell, using C programming language. Responsibilities included designing and implementing core functionalities such as command parsing, execution, and handling of built-in commands. Collaborated with team members to ensure robustness, efficiency, and adherence to Unix shell standards. Demonstrated proficiency in C programming, problem-solving, and teamwork throughout the development lifecycle
